

Paying your bill will get easier

We are upgrading our billing system to ensure you always have a simple, clear, and convenient payment experience. It will be easier than ever to view and manage your medical bills digitally using a mobile device or computer, in addition to the paper statements you're accustomed to receiving.

Convenient, transparent and secure

Conveniently manage your bills on-demand with the click of a button

Manage all your billing needs with no phone calls required

Checkout securely in as little as three clicks without any new apps or account set-up

How it works

1. Receive notification

When your bill is ready to be paid, you will receive a notification using your contact methods on file (**email, text message** and/or **paper statement**) with a link to view and pay your bill online.

2. View bill and payment options

After visiting the link, you will have the option to **pay your total balance** or **setup a payment plan**, as well as view your bill details or chat with one of our representatives if you need help.

3. Make payment

When you're ready to make a payment, you can do so using secure payment methods such as **credit/debit card, ACH, Apple Pay** or **Google Pay** or send in a **check**, and easily get a receipt for your records.
